- Content of Workshop = 6.69
- Workshop Materials = 6.47

Results of 79.5% Evaluation Responses

PROJECT MANGEMENT TRAINING: GENERAL COMMENTS

The decomposition using a work breakdown structure was most valuable since this is the piece generally missing when a project is run at my department.

I liked hearing the instructor's real life examples and how he approached those. Great instructor!

I've been recommending this training. Earl did a wonderful job keeping everyone engaged and learning. He's great and the material was wonderful. A very good use of 3 days.

Please offer more of these types of classes!

I thought this was one of the most relevant and most helpful classes I have ever taken with the state.

Great class, I'm excited to put the skill learned to work!

PM TRAINING: NEXT STEPS

- Reserved rooms for the week of May 13, 2013
- Will discuss possible additional classes with PMOAG.

IT CONFERENCE: PM TRACK

8 Sessions:

- Delivering IT Projects On-time and within Budget
- Building the Business Case
- The Agile Framework
- Are We There Yet? The long, winding road to project portfolio maturity
- Prevent Failed Project Implementation: The "Slow Trigger, Fast Bullet" Approach
- The 360° Analyst
- The 360° Analyst's Toolbox
- Go" or "No Go"? Large scale system development critical milestone management

IT CONFERENCE: PM TRACK

Some Statistics:

- Total number of attendees: 400
- Average per session: 50
- Feedback from 50% of the attendees for each session

AGILE SIMULATION WORKSHOP

Workshop Goals:

- learn the basic principles of agile planning
- gain some experience in planning sprints

Description:

Attendees will simulate several agile sprints during which they will complete several tasks including sprint planning, backlog prioritization, sprint execution and retrospectives.
